

Farmers -scientist interaction meet on “Climate-smart Agriculture for Improving Soil Health”

Farmers -scientist interaction meet on “Climate-smart Agriculture for Improving Soil Health” was organized on 1st February, 2021 at Bagoniya village, Bhopal, M.P. On this occasion under the chairmanship of Dr. A.B. Singh, team of scientists (Dr. Pradeep Dey, Dr. R. Elanchezhian, Dr. Manoranjan Mohanty, Dr. RK Singh, Dr. Dolamani Amat, Dr. Asit Mandal and Dr. JK Thakur) participated in the event. During the programme, Scientist team, briefed about the importance of soil health for improving crop productivity and ultimately human and animal health. They explained about the importance of soil sampling and soil testing strategies, soil health card, organic farming and conservation agriculture for better soil health assessment and management. They also briefed about the components under SCSP scheme and requested the farmers to actively participate in the activities of SCSP project going on in the adopted villages. Shri Raja Miya, Sarpanch, Bagoniya and Shri. Deepak Kumar Rai, Panchayat Secretary, explained about the different schemes of the Govt. of India and State Govt. for doubling the farmer’s income. A total of about 100 farmers actively participated following social distancing norms and interacted with the scientists about their concern related to farming. Some farmers raised the issues and problems related to their crop production and scientists addressed them in the meeting.
